INSTRUCTIONS AND INFORMATION

1. The question paper consists of FOUR questions.
2. Answer ALL the questions.
3. ALL drawings must be drawn to scale 1 : 1, unless otherwise stated.
4. ALL the questions must be answered on the answer sheets provided.
5. ALL the answer sheets must be re-stapled in numerical sequence and handed in irrespective of whether the question was attempted or not.
6. Careful time management is essential in order to complete all the questions.
7. Print your name in the block provided on every ANSWER SHEET.
8. ALL answers must be drawn accurately and neatly.
9. Any details or dimensions not given must be estimated in good proportion.
10. ALL drawings are in third angle orthographic projection, unless otherwise stated.

SECTION C-C

SECTION A-A

SECTION B-B

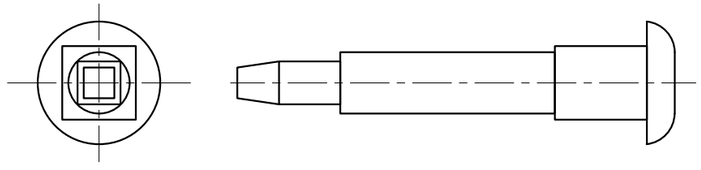

QUESTION 1: ANALYTICAL (MECHANICAL)

Given:
A detailed drawing of an aircraft bracket, a title block and table of questions. The drawings are not presented to the indicated scale.

Instructions:
Complete the table below by neatly answering the questions, which all refer to the accompanying drawings, the title block and mechanical content. **[28]**

	QUESTIONS	ANSWERS		
1	On what date was the drawing checked?		1	
2	What is the title of the drawing?		1	
3	Which drawing method was used to create these drawings?		1	
4	How many aircraft brackets need to be manufactured?		1	
5	What heat treatment is required?		1	
6	What tolerance is allowed on the dimensions?		1	
7	Name the feature at A.		1	
8	What would VIEW 3 be called?		2	
9	What does the abbreviation CSK stand for?		1	
10	What type of section resulted from cutting plane C-C?		1	
11	What type of section resulted from the combination of cutting A-A and B-B?		2	
12	Determine the complete dimensions at : B: C: D: E:		4	
13	Name the feature at F.		1	
14	What does the 3, in Ø22 x 3, refer to?		1	
15	What does the abbreviation CRS stands for?		1	
16	What thread size must a component have in order to be coupled to the bracket?		1	
17	What is the purpose of the spot face?		2	
18	What does the machining symbol ♂ mean?		1	
19	With reference to the tolerance, determine the minimum dimension at G.		2	
20	In the space below on the given shaft, draw, in neat freehand, the SANS convention for a square on a shaft, on the right view of the shaft below.		2	
		TOTAL	**28**	

ANSWER 20

JNAR ENGINEERS	84 KNOT STREET MAYDAY SOUTH END www.jnarengineers.co.za ☎ 046 821 4911	
TITLE: **AIRCRAFT BRACKET**		
ALL DIMENSIONS ARE IN MILLIMETERS, UNLESS OTHERWISE SPECIFIED. TOLERANCES ON DIMENSIONS ARE ±0,25.	SCALE: 1 : 2	ALL UNSPECIFIED RADII ARE R3, AND ALL SURFACE TEXTURE FINISHES ARE: ♂
PROGRAMME: AUTOCAD 2026		MATERIAL: CAST IRON
FILE NAME: AIR2026-199630.dwg		HEAT TREATMENT: HARDENING
DRAWING NO: BRACKET/630/2026		PATENTED: 1989
DRAWING SET: 1 OF 5		QUANITY: 30 000

4.			
3. ADD MACHINING SYMBOLS			2026/02/08
2. INCREASE TOLERANCE RANGE			2026/04/14
1. INSERT SPOT FACE			2026/03/07

C

QUESTION 2: LOCI (CAM)

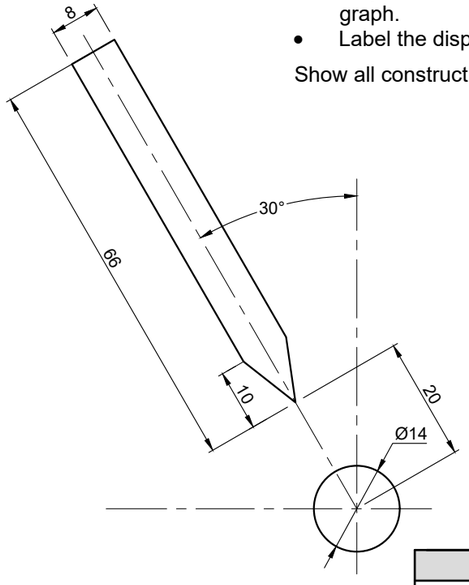

Given:
- The details of the camshaft and a wedge-shaped follower in the starting position.
- Reference point C on the answer sheet.

Specifications:
- Camshaft = Ø14 mm.
- The minimum from the cam profile to the center of the camshaft = 20 mm.
- Rotation = clockwise.

Motion:
The cam imparts the following motion to the follower:
- 0° to 30°, follower rises 44,5 mm with uniform motion.
- 30° to 60°, follower rises a further 16 mm with uniform motion.
- 60° to 90°, dwell period.
- 90° to 180°, follower falls a 26 mm with simple harmonic motion.
- 180° to 210°, follower falls a further 29 mm with uniform motion.
- 210° to 270°, follower rises 22 mm with acceleration.
- 270° to 315°, follower rises 16,5 mm with retardation.
- 315° to 330°, dwell period.
- 330° to 345°, follower falls 29 mm with uniform motion.
- 345° to 360°, follower returns to original position with uniform motion.

Instructions:
- Draw to scale 1 **:** 1, the given camshaft and the wedge-shaped follower.
- Show the direction of rotation on the cam profile.
- Draw to a rotational scale of 360° = 132 mm and a displacement scale of 1 **:** 1, the displacement graph for the required motion.
- Project and draw the cam profile from the displacement graph.
- Label the displacement graph and the scale.

Show all construction and projection. **[38½]**

CAM AND FOLLOWER DETAIL

ASSESSMENT CRITERIA			
1	GIVEN + MINIMUM DISTANCE + CL	4½	
2	GRAPH CONSTRUCTION	5	
3	DISPLACEMENT GRAPH	13	
4	CAM CONSTRUCTION	4	
5	CAM PROFILE + CURVE QUALITY	12	
PENALTY (-)			
	TOTAL	**38½**

QUESTION 3: ISOMETRIC

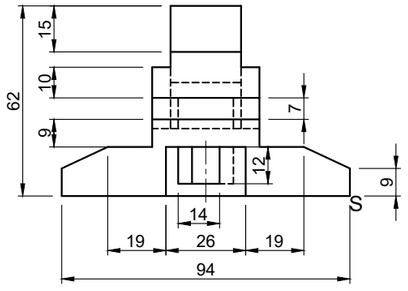

Given:

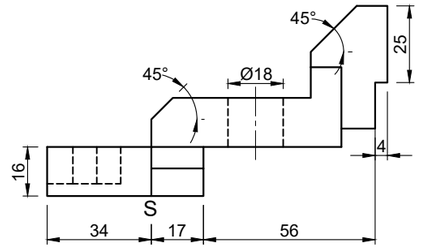

- Three views of a SUPPORT BRACKET in third angle orthographic projection.
- Starting point S.

Instructions:

- Draw, to scale 1 **:** 1, a isometric view of the SUPPORT BRACKET.
- Make point S the lowest point of the drawing.
- Show ALL necessary construction.
- NO hidden detail is required. **[44]**

S

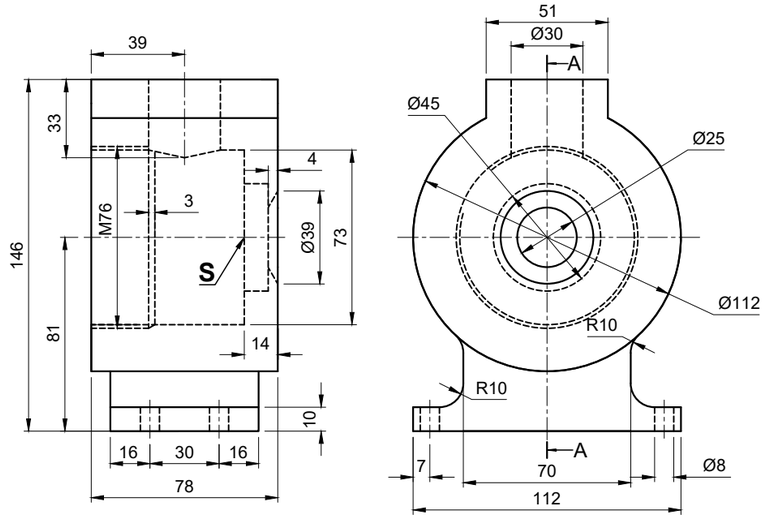

ASSESSMENT CRITERIA			
1	AUX VIEW + PLACEMENT	$22\frac{1}{2}$	
2	LOWER PORTION	$21\frac{1}{2}$	
3	UPPER PORTION	15	
4	CIRCLES + CL'S	5	
	TOTAL	**44**

QUESTION 4: MECHANICAL ASSEMBLY

Given:

- Orthographic views of each of the parts of the transfer box.
- The exploded isometric drawing of the parts of a transfer box assembly, showing the position of each part relative to the others.
- Point S in the front view of the housing.
- Starting point S on the answer sheet, page 6.

Instructions:

- Answer this question on page 6.
- Draw, to scale 1 **:** 1 and in third angle orthographic projection, the following views of the assembled parts of the transfer box.
  - 4.1 **The sectional front view**, on cutting plane A-A, as seen from the direction of the arrow shown on the exploded isometric drawing. The cutting plane is shown on the right view of the housing (part 6).
  - 4.2 **The right view.**

NOTE:

1. Starting point S is indicated on the front view of the housing (part 6).
2. Show THREE faces of the M15 nut (part 12) in the sectional front view.
3. Draw the conventional representation of the spur gear (part 9) and the bearing (part 5) in both views.
4. Show ALL construction.
5. NO hidden detail is required.
6. All drawings must comply with the guidelines contained in *SANS 10111*.

Add the following features on the drawing:

- The construction method for the M15 nut.
